

# Emerge & Evolve

CARPET TILES

# ORIGIN: ENDLESS FLOW

The DESSO by Tarkett Origin range is a true embodiment of our Beauty of Circularity philosophy. Its newest carpet tile collections, Emerge and Evolve, were made to be remade in an endless closed-loop cycle. Just like Origin's Recharge and Retrace collections, their designs take inspiration from the circular process itself. An endless flow of circular materials, systems and spaces.

# Our Commitment to Circularity

More than a decade ago, we decided to place circularity at the core of our ambitions as a business, moving away from our industry's standard take-make-waste model towards a closed-loop system. We call our commitment the Beauty of Circularity.

# Endless Flow of Materials

From top to bottom:  
Polyamide 6 Nylon Yarn  
Polyolefin Granules  
Shredded Backing  
PA6 Nylon Granules  
Reclaimed Polyamide 6 Yarn

Emerge and Evolve are built on the core idea that materials are not in a fixed state, but engaged in a constant cycle of transformation. From upcycled calcium carbonate and regenerated PA6 yarn to pine rosin, each material has been carefully chosen for its ability to be recycled many times over – while adhering to strict health and environmental standards.

Always changing, ever evolving. An endless flow of materials.

# Endless Flow of Circular Systems

After their long life, Emerge and Evolve can be returned to our on-site recycling facility to become the next generation of flooring. Our pioneering take-back and recycling programme, ReStart®, makes this circular journey possible, separating yarn and backing at our Carpet Recycling Centre in the Netherlands before they begin their new life. Endlessly flowing from one generation of flooring to the next.

# Origin Material Journey

Truly circular, our carpet tiles are made of two main components — yarn and our innovative EcoBase backing — that come apart and are recycled into new carpet tiles.

VIEW IN LOCAL LANGUAGE

## Carpet Yarn material journey

### Returned Carpet Tiles

Rather than being discarded after a long life, used carpet tiles are returned to us via our pioneering ReStart® programme, to continue their journey within our unique closed-loop manufacturing system.

### Reclaimed Polyamide 6 Yarn

At our Carpet Recycling Centre, the polyamide 6 yarn is separated from the EcoBase backing and purified as it is prepared to be regenerated.

### PA6 Nylon Granules

Once clean, the polyamide 6 yarn is transformed into PA6 nylon granules by our partner Aquafil, in a process that can be carried out again and again.

### Polyamide 6 Nylon Yarn

The PA6 nylon granules are then turned into new yarn, ready to produce the new generation of Origin carpet tiles back in our factory.

## Carpet Backing material journey

### Shredded Backing

At our Carpet Recycling Centre, EcoBase backing is separated from the yarn, and shredded as we prepare it to be regenerated for circular reuse.

### Polyolefin Granules

Shredded EcoBase backing is transformed into polyolefin granules in a process that can be carried out over and over again.

### Pine Rosin

Pine rosin, otherwise destined for waste from the Scandinavian paper industry, is combined with the polyolefin granules.

### Calcium Carbonate

Upcycled calcium carbonate, a by-product from the local drinking water industry, is added to the mix of polyolefin granules and pine rosin, and transformed to make the EcoBase backing for a new carpet tile.

# Design

Emerge's subtle, material-rich design takes its cues from the texture and pattern of reclaimed carpet yarns. Its base tone is complemented by colour accents found within the pattern's intermittent strokes. Evolve's organic design recalls the evolution of upcycled calcium carbonate on its circular journey. Its bold, non-directional pattern makes a strong design statement, and the movement created across each tile can be used to guide visual flow. With a more evenly distributed pattern, Emmerge brings cohesion and calmness to a space. Though contrasting in appearance, Emmerge and Evolve can be combined with Recharge and Retrace to support both expressive and subtle applications, in spaces large or small.

# Colour

With a palette of 32 calm and welcoming neutral colours across the two collections, Emerge and Evolve offer multiple options for colour coordination. Evolve's palette of 16 tone-on-tone colours brings warmth and calm, designed for perfect cohesion with Emerge's core colours and allowing for multiple colour combinations. Emerge offers a palette of 16 base and accent tones, bringing endless potential to coordinate with furniture and wall finishes. By focusing on tonal ranges and softer colours, Emerge and Evolve provide a pleasing contrast with the more vivid hues found within the Recharge and Retrace collections.

# Beauty of Circularity

At Tarkett, our approach to circularity focuses on three key areas: design, materials and circular journey. For us, the Beauty of Circularity is about the beauty of the reused materials that go into our products, the innovative manufacturing processes we implement, and the knowledge that we're actively cutting down on waste and greenhouse gas emissions.

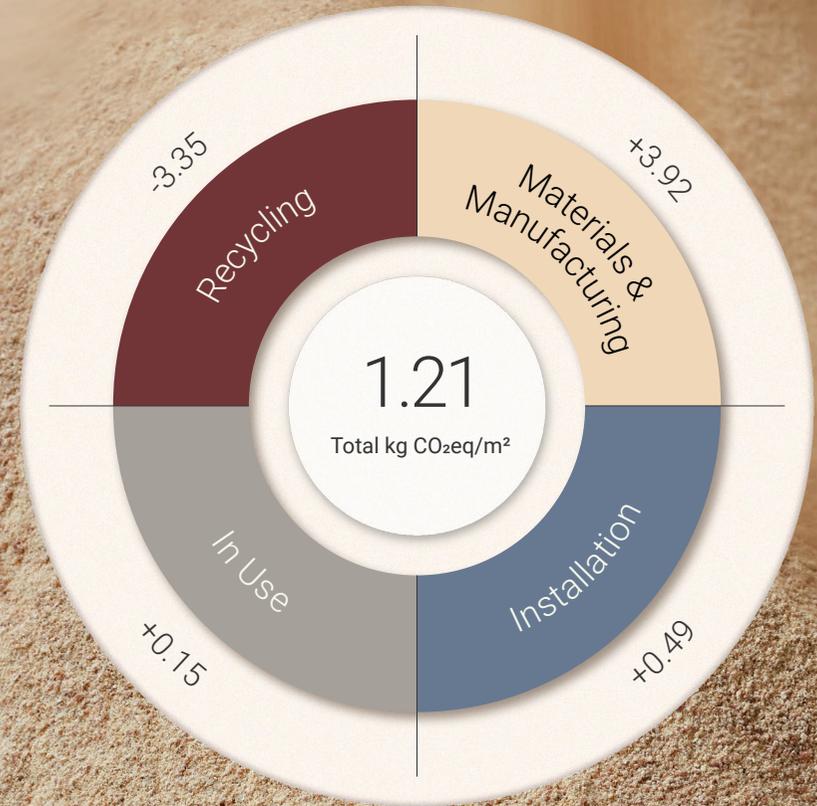

# DESSO EcoBase®

As part of our continuous efforts to reduce our carbon footprint we are proud to launch an improved EcoBase® backing, which sees a new bio-based ingredient replace a core ingredient formerly composed of petroleum-based content.

# Our Circular Carbon Footprint

DESSO Emerge

To keep track of the carbon generated and saved over each product's lifecycle, we calculate and externally verify the Circular Carbon Footprint of our DESSO carpets. We limit the use of virgin raw materials for new products and avoid common carbon-emitting options such as incineration and landfill at product end-of-life.

Circular Carbon Footprint: according to the Environmental Product Declaration (EPD) EPD-IES-0026338:001 DESSO Emerge externally verified by Bureau Veritas, based on the total carbon footprint (Modules A-D) with a closed loop circular recycling scenario, facilitated through Tarkett's Restart® recycling and take-back program. With a history of more than 140 years, Tarkett is a worldwide leader in innovative and sustainable flooring and sports surface solutions, generating turnover of € 3.3 billion in 2024. The Group has close to 12,000 employees, 24 R&D centers, 8 recycling centers and 35 production sites. Tarkett creates and manufactures solutions for hospitals, schools, housing, hotels, offices, stores and sports fields, serving customers in over 100 countries. To build “The Way to Better Floors,” the Group is committed to circular economy and sustainability, in line with its Tarkett Human-Conscious Design® approach. Tarkett is listed on the Euronext regulated market (compartment B, ISIN: FR0004188670, ticker: TKTT) [www.tarkett-group.com](http://www.tarkett-group.com)
